SAVEURS SÉLECTION

YOUR AI-POWERED RECIPE RECOMMENDER!
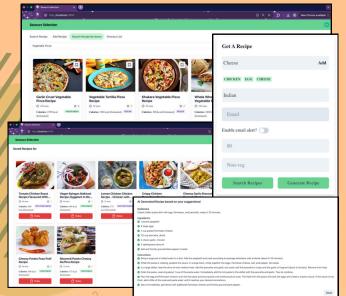

🍴 ABOUT:

Struggling to decide what to cook? **Saveurs Sélection** suggests recipes based on the ingredients you already have. Our AI Chef provides smart substitutions, so you're never out of options. Need a fully customized dish? Generate complete recipes just for you. Plus, our auto-generated grocery list simplifies shopping. Cook smarter, save time, and enjoy stress-free meal planning.

🍴 WHAT'S NEW IN VERSION 2.0?

🎨 **A brand new theme:** A fresh green theme, easy on the eyes with great contrast for seamless navigation. The recipe list with pagination ensures smooth scrolling, alongside a new & enhanced search panel!

📍**Bookmark your favorite recipes:** Never lose track of your favorite dishes! Save recipes with a single click and access them anytime in your profile. Build your personal cookbook and revisit your top picks effortlessly!

✧⁺**Ask Chef-Gemini:** Your AI-Powered Culinary Genius! Need ingredient swaps for dietary needs, missing items, or fitness goals? Chef Gemini provides smart, AI-driven substitutions so you can cook any recipe without compromise!

📄 **Find a recipe that suits your pantry:** Simply enter what's in your pantry, choose a cuisine, and set your cooking time—Chef Gemini will generate a custom, easy-to-follow recipe just for you. No more stressing over what to cook

🛒 **Generate a grocery list:** Effortlessly generate a personalized grocery list from your chosen recipes, saving time and ensuring you never forget an ingredient again. Shopping has never been this easy or organized!

✓ **WITH 70+ TEST CASES & 65% TEST COVERAGE!**

🍴 WHAT'S IN STORE NEXT?

🔘 **Dark Mode - (Week 1)**
Elevate the user experience with a sleek, eye-friendly dark mode that enhances usability during late-night cooking sessions.

🔊 **Voice guided cooking instructions - (Week 2-3)**
Transform the way users interact with recipes by introducing hands-free, voice-guided cooking instructions—perfect for multitaskers and making the kitchen experience smoother and more intuitive.

👤 **User engagement features - (Week 2-4)**
Build a social-media-style feed where users can explore new recipes. Introduce likes, comments, and shares to promote user interaction. This will also revamp the recipe rating system based on number of likes and help introduce promo content like 'Recipe of the Week' in the future.

🥗 **Nutrition Tracker - (Week 2-4)**
Provide detailed nutritional information for each recipe, helping users track calories, macros, and allergens for a healthier cooking experience.
